Summary Statement:

I am a graduate of the CS50x, CS50P and CS50web courses from Harvard University, with a strong foundation in computer science and web development. I am seeking a junior developer position where I can leverage my skills in Python and JavaScript, as well as my experience in team leadership and logistics. I am particularly interested in opportunities to work on projects related to e-commerce, logistics, and supply chain management.

Education:

- CS50x, CS50P and CS50web Harvard University, 2022-2023
 - Coursework included: Introduction to Computer Science, Programming with Python, Web Development with Python and JavaScript
 - Completed several projects related to web development, including a Django-based e-commerce platform and a data analysis tool using Python

Work Experience:

- IT support at Land of Beauty, 2014-2016:
 - Set up and configure new hardware and software systems, including desktops, laptops, printers, and servers

- Configured network settings, including routers, switches, and firewalls, to ensure reliable and secure connectivity
- Managed the company's eBay account, creating and managing auctions to support online sales
- **Team Leader Support, GX0 (former XP0), 2016-2021**
 - Led a team of support staff in the warehouse and distribution centre
 - Assisted in the planning and execution of logistics operations
 - Trained and supervised new team members
 - Managed pickers and stock checking
 - Created and managed user accounts for warehouse staff, assigning appropriate roles and permissions within the system
 - Provided hourly reports on key performance indicators (KPIs)
- **Admin, Amazon, 2021-Present**
 - Creating and maintaining files, records, and databases
 - Handling incoming and outgoing correspondence and emails
 - Managing office supplies and equipment inventory and ordering new supplies as needed
 - Scheduling deliveries, tracking shipments, and managing the flow of goods and materials within the warehouse

Skills:

- **Programming Languages:**
 - Proficient in Python programming language, with experience developing web applications using the Django framework
 - Familiar with JavaScript and frontend development technologies, including HTML and CSS
- **Web Development Frameworks and Tools:**

- Familiar with Django REST framework, including creating RESTful APIs and handling HTTP requests and responses
 - Skilled in working with AWS services, including EC2 and S3 to deploy and manage scalable web applications
 - Experienced in working with relational databases, including
- **Transferable skills:**
 - Strong problem-solving and analytical skills
 - Team leadership and management experience
